

CONSERVATION

Diverse and rich is the layering of the Aussie bushland. The endless sway of hardy *gums*, the persistent crawl of the *Matted bush pea* and the quiet journey of the *Cumberland plain land-snail*, nowhere else on earth will you get to experience such a unique chorus of sound and sight.

Local community members are invited to attend a **FREE WORKSHOP** demonstrating the basics of conservation land management. Participants attending this workshop will gain an introductory understanding of the best practice bush regeneration skills required to work within a Bushcare/Landcare group. The workshop will present techniques and principals employed to restore the Wivenhoe Conservation area at Cobbitty, NSW.

Workshop Two SATURDAY 21ST MAY 2016*

10am - 12pm

The Mater Dei School
Macquarie Grove Drive, Cobbitty

(Light lunch provided - please advise of any dietary requirements)

*Dates may change due to unforeseen circumstances

Conservation land management focuses on the rehabilitation and ongoing management of degraded ecosystems by implementing best practice management techniques and strategies. This workshop is designed to enable volunteers to restore degraded ecosystems through careful site planning, flora and fauna monitoring and the implementation of on ground works. Keep an eye out for the next workshop, diary dates below:

13/2

21/5

20/8

19/11

RSVP to Daryl Wells via phone 0414 188 859 or email daryl@toolijooa.com.au detailing numbers and dietary requirements by 5PM ON WEDNESDAY 18TH MAY 2016.
